Come hear our panel of experts talk about the design and construction of the 35-story Capitol Tower project in downtown Houston.

This development includes a complex real estate transaction, the implosion of an 18-story building on the site and finally the design and construction of a transformative project that ties into Houston's tunnel system.

Our panelists will provide unique perspectives from the point of view of a developer, a designer and a builder on the next generation of highly amenitized office buildings.

**PANELISTS:**

- Ben Llana, Director-Development, Skanska Commercial Development
- Kristopher Stuart, Design/Principal, Gensler
- Matt McCaffrey, Project Executive, Skanska USA Building
